EIN: 14-2214679 · Organizational (Type 2) NPI: 1342281247

WINSTON IMAGING — SYSTEMS DIRECTORY

Directory reference: WI-SYSDIR
Revision date: 02/14/2025
Prepared by: Patrick Feeney, Site Administrator (Colonie)
Contact: pfeeney@winstonimaging.com · (518) 555-0212
Distribution: Winston Imaging site administrators (Colonie, Latham, Clifton Park); Winston Billing Office; incoming Coopa Blue integration liaison (upon close)

This directory reflects Winston Imaging systems configuration as of 02/14/2025, prior to the anticipated Coopa Blue equity acquisition (close 03/03/2025). All billing identifiers reflect Winston's own organizational (Type 2) NPI 1342281247. The identifier configured in each application is recorded verbatim from that application's current settings; where an application does not carry a billing identifier natively but has been configured to output one on billing feeds or claims files, the configured value is shown.

Each system row below records the current data owner within Winston Imaging as of the revision date. Ownership responsibilities do not transfer under this directory; any change in ownership following the anticipated close will be recorded by the acquiring party.

System Inventory

	System Name	System Purpose	Legacy Org NPI Configured	Site Coverage	Data Owner	Notes
1	Winston PACS	Picture Archiving and Communications System — study storage, prior comparison, and diagnostic viewing for all three sites.	1342281247	Colonie, Latham, Clifton Park	Patrick Feeney (Site Administrator, Colonie)	Billing identifier stamped on DICOM SR structured reports and included in downstream billing feed; Winston Type 2 NPI hard-coded in interface configuration file.
2	Winston RIS	Radiology Information System — order entry, exam status tracking, reading worklists, and radiologist assignment.	1342281247	Colonie, Latham, Clifton Park	Diane Whittaker (RIS Coordinator, Latham)	Organizational NPI configured on the practice-level record; per-radiologist Individual NPI carried separately in the provider table and not maintained through this record.
3	Winston Billing (legacy)	In-house professional and technical billing application; claim generation, remittance posting, and A/R aging.	1342281247	Colonie, Latham, Clifton Park	Marcia Doyle (Billing Manager)	Type 2 NPI 1342281247 populated in Billing Entity master; appears on every outbound 837 claim as the billing provider NPI. Winston Billing (legacy) is the live claims system as of the revision date.
4	Winston Employee Directory	Winston workforce directory — employee and contractor contact records, department, reporting structure, and site assignment.	1342281247	Colonie, Latham, Clifton Park	Sylvia Ortiz (HR / Office Manager)	Organizational NPI attached at the entity header level for exports supplied to payer credentialing and directory-verification requests.
5	Winston Scheduling	Patient scheduling and modality time-slot management; walk-in intake at Clifton Park screening slots.	1342281247	Colonie, Latham, Clifton Park	Denise Kaminski (Scheduling Supervisor)	NPI carried on the site-level configuration used for eligibility inquiries submitted at the point of scheduling.
6	Winston Voice Reporting	Voice-recognition dictation, structured template capture, and radiologist report finalization.	1342281247	Colonie, Latham, Clifton Park	Patrick Feeney (Site Administrator, Colonie)	Reads Individual NPI from the RIS user directory; Winston Type 2 NPI is stamped in the report footer configuration only.
7	Winston Modality Worklist	HL7 / DICOM Modality Worklist broker — pushes scheduled exam context to CT, MR, US, and mammography modalities.	1342281247	Colonie, Latham, Clifton Park	Curtis Wren (Modality Engineer, Latham)	Organization identifier attached at the AE-title mapping table used for cross-site routing between Latham and the reading pool at Colonie.

	System Name	System Purpose	Legacy Org NPI Configured	Site Coverage	Data Owner	Notes
8	Winston HL7 Interface Engine	Central HL7 message routing between RIS, PACS, Billing, Voice Reporting, and external referring-provider EMRs.	1342281247	Colonie, Latham, Clifton Park	Curtis Wren (Modality Engineer, Latham)	The Sending Facility identifier field is populated with 1342281247 for outbound messages to payer clearinghouses; inbound messages inherit from the transmitting system.
9	Winston Referring Provider Portal	External-facing portal used by referring practices to place orders, view reports, and download images.	1342281247	Colonie, Latham, Clifton Park	Denise Kaminski (Scheduling Supervisor)	Winston Type 2 NPI displayed as the billing provider on the ordering-practice landing page; referring physician NPIs stored separately in the referring-provider table.
10	Winston Report Distribution	Report fax and encrypted-email delivery to referring providers and patients; delivery logging.	1342281247	Colonie, Latham, Clifton Park	Sylvia Ortiz (HR / Office Manager)	Cover-sheet template pulls the Winston Type 2 NPI from the Billing Entity master maintained in Winston Billing (legacy).
11	Winston Quality Assurance Log	Peer review, discrepancy log, and turnaround-time tracking for the reading radiologist cohort.	1342281247	Colonie, Latham, Clifton Park	Dr. Gary Osei (QA Lead, Latham)	Organizational NPI carried at the entity level for regulatory submissions; Individual NPI per reviewer stored in the peer-reviewer table.
12	Winston Time & Attendance	Employee time capture, PTO tracking, and payroll export to Winston's outside payroll vendor.	1342281247	Colonie, Latham, Clifton Park	Sylvia Ortiz (HR / Office Manager)	Payroll export carries Winston Type 2 NPI 1342281247 in the employer-identifier field for regulatory files that require it.

Notes on Configuration

N-1. Every application in this directory is configured with Winston's own organizational NPI.

tional (Type 2) NPI 1342281247. This is

N-2. Individual (Type 1) NPIs — the personal identifiers held by each Winston radiologist and technologist — are maintained per user in Winston RIS (the provider table) and in Winston Billing (legacy) (the rendering-provider table). Those Type 1 values are not listed in this directory; each user record carries the user's own Type 1 NPI as issued to that person.

N-3. The billing identifier configured in each application above is the identifier written to that application's outbound feeds (claims files, HL7 messages, cover sheets, portal display, or exports) as the billing organization. No application in the inventory is configured with a Type 2 NPI other than 1342281247 as of the revision date.

N-4. Post-close configuration of the acquiring party's identifiers is out of scope for this directory. Any change to the configured billing identifier in an application listed above — including a change to reflect a consolidated organizational NPI operated by an acquiring parent — will be executed by the acquiring party's IT function under the change-control procedure that will apply post-close, and will be recorded outside this directory.

N-5. Winston Imaging maintains no separate credentialing application; provider credentialing files are held in paper form in the Winston site administrator's office at Colonie and are indexed on a spreadsheet retained by the Site Administrator. That spreadsheet is not enumerated in this directory because it is not an information system.

Signature

COOPA BLUE HEALTH, INC.*a New York not-for-profit corporation · 1200 Washington Avenue, Albany, NY 12206 · Main (518) 555-0140***Correction Addendum — Billing Master-Data System**

Document:	Correction Addendum to Winston Imaging Legacy Systems Directory (WI-SYSDIR / rev 02.14.2025)
Control No.:	INT-2026-017-A
Revision:	04/2026
Classification:	INTERNAL — CONFIDENTIAL
Entered by:	Randy Toohey, IT / Systems (billing master-data ops) — rtoohey@coopablue.org
Effective:	04/02/2026
Applies to:	The Coopa Blue billing master-data system record identified below

1. Purpose

1.1 This addendum records a single correction executed in the billing master-data system against the record of a Winston-origin provider. It is filed with the Winston Imaging Legacy Systems Directory (WI-SYSDIR / rev 02.14.2025) as the archival companion to that directory. It does not modify, and cannot be read to modify, the Winston legacy directory body on pages 1–2, which is retained in its original form.

1.2 The correction is one instance of the per-provider identifier migration described in the Winston Imaging Acquisition Integration Plan (INT-2025-015), Section 3.

2. Correction Recorded

Field	Value
System	billing master-data system
Field corrected	Billing_Group_NPI
Record subject	Patrick Nakamura, MD, Diagnostic Radiology
Record subject — Individual (Type 1) NPI	1535986842
Record subject — practice site	Winston Imaging — Colonie
Prior value	1342281247
New value	1384970293
Effective date	04/02/2026
Change request reference	BMDS-CR-2026-041
Reason	Post-acquisition consolidation of billing organizational NPI per A15 Integration Plan; migration

3. Notes

3.1 This correction is effective in the billing master-data system as of 04/02/2026. The billing master-data system carries the corrected value from the effective date shown above. Change request reference: BMDS-CR-2026-041.

3.2 The paired OpenMRS attribute update for the same provider — attaching a new Billing_Group_NPI value on the provider's OpenMRS record — is executed under the same change request reference (BMDS-CR-2026-041) and is recorded in the OpenMRS attribute history for that provider. Per the append-only semantics of the Billing_Group_NPI attribute described in the field mapping crosswalk, the prior value is superseded on the record but is not deleted.

3.3 No change is made by this addendum to the Winston legacy directory body on pages 1–2. The directory body reflects Winston's own systems configuration as of 02/14/2025 (pre-close) and is retained unchanged for archival integrity. This addendum is filed as a Coopa Blue-stamped page under Coopa Blue's document-control conventions.

3.4 This addendum records one record correction only. Corrections against other Winston-origin provider records — where executed — are recorded on their own change requests and against their own record subjects. This addendum is not a roster and is not an audit output.

4. Attestation

Entered in the billing master-data system and reviewed against the change request record:

Randy Toohey

IT / Systems, Coopa Blue Health, Inc.
